

BIM Maturity Tool

Training material

planen-bauen 4.0 GmbH

SHORT DESCRIPTION

BIM Maturity Tool

The main aim of the Tool is to give guidance to stakeholders regarding BIM implementation in renovation projects on the basis of their respective level of BIM maturity. This is achieved through an online tool that guides the stakeholders to BIM use cases that are tailored to their respective level of BIM maturity.

Who can use the tool?

The BIM Maturity Tool can be used by stakeholders involved in renovation projects who are interested in approaching the renovation with BIM-based methodologies.

MAIN TOPICS

BIM Maturity Tool

Step 1

General part

General information on
stakeholder

Step 2

Company part

Input information on
company

Step 3

Project part

Input information on
project

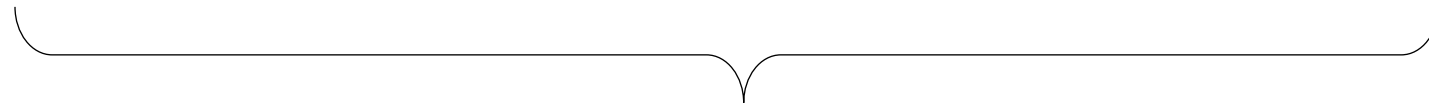

Results

Based on the given
information

BIM Maturity Index

Identification of use cases

Summary

Enter information

Present level of BIM maturity
Proposals for appropriate BIM use cases

Achieved goals

Determine the feasibility of using BIM for renovation projects

Define the scope of BIM implementation for renovation projects

Facilitate the implementation of BIM in renovation projects
